

# DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Discover. Learn. Empower.

## WORKSHEET 8

**Student Name:** Harsh

**UID:** 23BAI70474

**Branch:** CSE(3<sup>rd</sup> Year)

**Section:** 23AIT\_Krg\_G2

**Semester:** 5<sup>th</sup>

**Date of Performance:** 27/10/25

**Subject Name:** ADBMS

**Subject Code:** 23CSP-333

### 1. AIM:

Design a robust PostgreSQL transaction system for the students table where multiple student records are inserted in a single transaction.

If any insert fails due to invalid data, only that insert should be rolled back while preserving the previous successful inserts using savepoints.

The system should provide clear messages for both successful and failed insertions, ensuring data integrity and controlled error handling.

### 2. Tools Used : Postgres

#### Solutions:

Q1)

```
DROP TABLE IF EXISTS students;
```

```
CREATE TABLE students ( id
    SERIAL PRIMARY KEY,
    name VARCHAR(50),
    age INT,
    class INT
);
```

```
DO
$$      BE
GIN
BEGIN
    INSERT INTO students(name, age, class) VALUES ('Supriya',16,8);
    INSERT INTO students(name, age, class) VALUES ('Rakshit',17,8);
```

```
INSERT INTO students(name, age, class) VALUES ('Varun',19,9);

RAISE NOTICE 'Transaction Successfully Done';

EXCEPTION
WHEN OTHERS THEN
    RAISE NOTICE 'Transaction Failed..! Rolling back changes.';
    RAISE;
END;
END;
$$;
```

```
SELECT * FROM students;
```

---

----- WRONG DATA TYPE SCENARIO -----

```
BEGIN; -- start transaction

SAVEPOINT sp1;
INSERT INTO students(name, age, class) VALUES ('Aarav',16,8);

SAVEPOINT sp2;
BEGIN
    INSERT INTO students(name, age, class) VALUES ('Rahul','wrong',9); -- fails
EXCEPTION WHEN OTHERS THEN
    RAISE NOTICE 'Failed to insert Rahul, rolling back to savepoint sp2';
    ROLLBACK TO SAVEPOINT sp2; END;

-- Next insert
INSERT INTO students(name, age, class) VALUES ('Sita',17,10);

COMMIT; -- commit all successful inserts
```

### 3. Output:

Kargil Practicals/postgres@PostgreSQL 17

```
23     INSERT INTO students(name, age, class) VALUES ('Varun',19,9);
24
25     RAISE NOTICE 'Transaction Successfully Done';
26
27     EXCEPTION
28         WHEN OTHERS THEN
29             RAISE NOTICE 'Transaction Failed..! Rolling back changes.';
30             RAISE;
31     END;
32 END;
33 $$;
34
35 SELECT * FROM students;
36
```

Data Output Messages Notifications

NOTICE: Transaction Successfully Done  
DO

Query returned successfully in 39 msec.

Data Output Messages Notifications

ROLLBACK

Query returned successfully in 35 msec.

#### 4. Learning Outcomes:

- ❑ Understand the concept of PostgreSQL transactions and how to start, commit, and rollback.
- ❑ Learn how to use **SAVEPOINT** to handle partial rollbacks within a transaction.
- ❑ Practice controlled error handling for individual insert failures without affecting other successful operations.
- ❑ Gain experience in maintaining **data integrity** while performing multiple inserts.
- ❑ Learn to generate informative **NOTICES** to monitor transaction progress and errors.
